

pleat

sound absorbing hanging panels
designed by By May.

The sound absorbent Pleat is a hanging panel with a design that plays with 3D vs. flat. The printed raster creates a light effect and enhances the three dimensional effect. The panel comes in three colors from light to dark. The depth is 2,5 cm.

The used material is aPerf, frameless acoustic panels, made out of 25-aPerf® toxicologically harmless, mostly recycled polyester, 100 % recyclable and non allergic.

Available in customized sizes and colours.

Design: By May Stockholm
Material: Recycled Polyester
Produced by Okko.
