

qwaiet wool

acoustic textiles
designed by margareta zetterblom

double

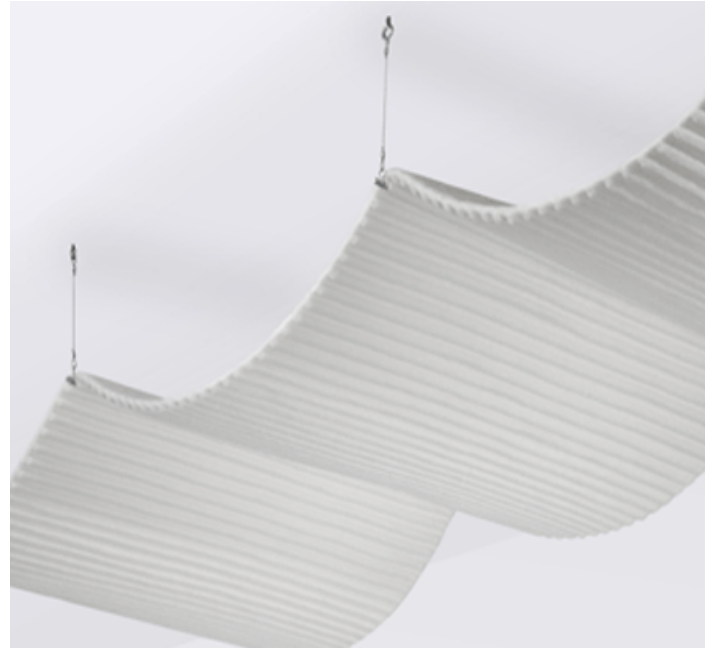

Qwaiet Wool is a new form of technically developed sound absorbing textile that has a visually appealing appearance and offers a sharp contrast to modern building materials such as concrete and glass.

The textile is sound absorbing and provides aesthetical values to public environments and home interiors.

Naturally soft, hardwearing and comfortable.

Aesthetically pleasing.

Formable with possibility to individual colour compositions.

single ceiling

Used materials are 100 % ecological wool.

Available in 12 standard colours.

Size and shape is customized as required.
