

TRATTI

Hanging sound absorber
Design by: Laura Tuorila

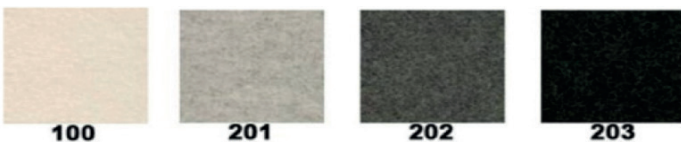

Tratti is a space structure and a hanging sound absorber. It is an acoustic solution designed to be used in indoor public spaces as in libraries, waiting halls, open offices and restaurants.

The aim was to define a certain space from above. Depending on the height and the height of its mounting Tratti creates different kinds of spaces.

Materials: Aluminium ring and ecological wool

Standard sizes: 1 m - 5 m in diameter, available in customized sizes

Standard colors: Cream white, light grey, grey and dark grey

Available in four standard colors.
